PROJECTS

• ANTI-SLEEP ALARM FOR DRIVERS USING ARDUINO

It is designed to prevent accidents while you're driving, and it can stop the car if you start to become sleepy. An Arduino and an eye-blinking sensor were used.

• IOT BASED HEALTH MONITORING SYSTEM FOR PREGNANT WOMEN AND PARENTAL CAR

An IoT-based health monitoring system integrates wearables and sensors for real-time monitoring of expectant mothers and newborns, enabling early complication detection and improving outcomes. It facilitates seamless communication between wearables and healthcare providers, allowing remote monitoring and timely intervention.

• PROTFOLIO WEBSITE | HTML AND CSS

This Project highlights my web development skills, showcasing clean and responsive designs. Each project demonstrates my ability to create visually appealing and functional websites, reflecting my expertise in front-end development and my passion for innovative web design.
